Aspiring Associate Product Manager | Customer Discovery, Problem Framing, Product Metrics
Bangalore, India | +91 9094996600 | suchi2004rajesh@yahoo.com | [suchithra-portfolio-ashy.vercel.app](#)

SUMMARY

B.Tech ECE graduate with 11+ months in a customer-facing role at Airtribe, where I run discovery with inbound leads, handle objections and own deals through to payment. Built five independent product case studies covering problem framing, RICE prioritization, success metrics and experiment design.

PRODUCT CASE STUDIES

Payments Stuck on "Processing" | *Fintech / UPI*

- Framed a pending-payment trust problem for a credit-first UPI app; mapped failure points across 6 layers of the payment stack, defined a reliability metric tree, ranked 5 solutions with RICE and designed 4 experiments with guardrail metrics.

Reducing Repeat Driver Cancellations | *Ride marketplace*

- Built a cancellation-reason taxonomy and marketplace metrics tree, defined a "Spiral Exposure Rate" metric, compared 3 interventions with RICE, and built a concept prototype of the rider recovery flow.

Demo → Payment Drop-off | *Edtech conversion*

- Mapped 5 objection families to funnel stages, prioritized 3 interventions with RICE (total-cost clarity first), and planned experiments with refund and learner-fit guardrails.

Myntra Personal Shopping Assistant | *E-commerce concept*

- Scoped price alerts, wishlist organization and recommendations; ranked 6 features with RICE, phased delivery, and set test plans with margin and notification opt-out guardrails.

AI Visibility Audit | *AI search / measurement*

- Analysed a published audit of 5 buyer-intent queries across 3 AI assistants; identified category-discovery gaps, sequenced 5 recommendations and proposed a repeatable measurement plan.

Independent concept work with illustrative data. Reports and prototype at portfolio link.

PROFESSIONAL EXPERIENCE

Business Development Intern → Executive | Airtribe, Bangalore 10/2025 – Present

- Ran discovery with inbound leads to qualify needs across 3 verticals (PML, BEL, Gen AI); closed Rs. 46.7L+ in sales independently after moving into the full-time role.
- Handled objections and closed most deals the same day, often with payment on the same call as the product demo.
- Closed at higher ticket sizes while keeping discount usage low, despite having room to offer discounts.
- Contributed Rs. 21L in the presales phase, including a month at 188% of target (Rs. 7.55L vs Rs. 4L); Top 10 on the sales leaderboard multiple times; promoted from Intern to Executive within 5 months.
- Identified enterprise leads needing custom solutions and routed them to the B2B sales team; built customer relationships that led to repeat business and referrals.
- Trained and mentored 2 new interns on the sales process and CRM workflows.

Intern | Wheels India Ltd, Chennai 06/2023 – 07/2023

- Worked cross-functionally on R&D prototype validation.

EDUCATION

B.Tech, Electronics and Communication Engineering | Amrita Vishwa Vidyapeetham, Chennai 2021 – 2025

SKILLS

Product: Problem Framing, RICE Prioritization, Product Metrics, Experiment Design, Funnel Analysis, Customer Discovery, Concept Prototyping, PRD, User Stories, Agile (Sprint Planning)

Technical: MS Excel, Google Sheets, Vercel | **Certification:** Data Structures and Algorithms using Python

AI Tools: ChatGPT, Gemini, Perplexity, Notion AI, Figma AI

Customer-facing: Consultative Selling, Objection Handling, Negotiation, CRM Pipeline Management
